VEENA

Software Development Engineer (SDE) | Full-Stack Web Developer | Data Analyst

veenasardana1@gmail.com | +91 8053745320 | Haryana, India | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science graduate (B.Tech, 2026) targeting SDE and web development roles, with hands-on full-stack and data analytics experience across four internship and fellowship roles. Builds React, Next.js, Node.js and TypeScript applications and analyzes data with SQL, Python, R, Power BI and Tableau. Published peer-reviewed researcher (IEEE). Works independently in remote-first teams and learns new frameworks quickly.

EXPERTISE: WHAT I BUILD

- **Full-Stack Web Development:** Full-stack platforms with React, Next.js, Node.js, and Express, using clean architecture and responsive layouts.
- **Frontend Engineering:** Interactive interfaces with React, Next.js, Three.js, and GSAP animations, built on modern UI systems.
- **AI-Powered Applications:** AI-integrated platforms using LLMs, vision APIs, automation workflows, and dynamic interfaces.
- **Data Analytics & Visualization:** Data-driven insights using Excel, SQL, Python, and Tableau to analyze datasets, identify trends, build dashboards, and support business decisions.
- **UI/UX and Interactive Design:** Responsive layouts with polished animations and interactions, backed by Google UX Design training.
- **Backend and API Systems:** Secure REST APIs, authentication systems, database architecture, and backend services.
- **Performance Optimization:** Faster rendering and loading, optimized data processing, and smoother user experiences.

SKILLS

Hard Skills: Full-Stack Development, REST API Design, JWT Authentication, Role-Based Access Control, Database Design, SQL Querying, Exploratory Data Analysis, Statistical Analysis, ETL, Data Cleaning, Data Visualization, KPI Reporting, NLP, Machine Learning, Deep Learning, Integration Testing, Debugging, Responsive Web Design

Soft Skills: Problem-Solving, Learning Agility, Ownership, Clear Communication, Teamwork

Tools/Software: JavaScript (ES6+), TypeScript, Python, SQL, R, React, Next.js, Angular, Node.js, Express.js, Tailwind CSS, Three.js, GSAP, PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Prisma, Pandas, NumPy, Power BI, Tableau, Advanced Excel, SAP Analytics Cloud, Streamlit, Git, GitHub Actions (CI/CD), Docker, Postman, Stripe, AWS, Vercel, Netlify, Railway

PROFESSIONAL EXPERIENCE

Data Analytics Intern | YuvaIntern — Jul 2026 - Sep 2026

- Uncovered sales, inventory-turnover and profitability patterns across 3-5 related retail tables, as measured by reusable KPI reports, by writing SQL with joins, CTEs, window functions and subqueries.
- Pinpointed in-demand skills and hiring trends across thousands of job-market records, as measured by visual workforce reports, by cleaning the data and running exploratory and statistical analysis in R.
- Compared traveler behavior and destination performance to support planning recommendations, as measured by KPI dashboards, by analyzing tourism datasets.

Frontend Development Fellow | Unified Mentor — May 2026 - Aug 2026

- Completed a 3-month responsive web development fellowship, as measured by 2 working platforms, by building with HTML, CSS, JavaScript, React and Firebase.
- Launched HometownHub, a location-aware community platform with real-time engagement, by integrating REST APIs and Firebase cloud database operations.
- Designed EntreSkillHub, a skill-to-startup platform that gives aspiring entrepreneurs structured resources, tools and opportunities, by connecting dynamic content to cloud data services.

Full-Stack Development Intern | CodeAlpha — Feb 2025 - Mar 2025

- Engineered a job portal covering frontend, backend and database layers, as measured by working authentication, job listings, applications, employer management and resume uploads, using Angular, Node.js and PostgreSQL.
- Accelerated search, filtering and multi-user operations, by optimizing PostgreSQL schemas and SQL queries and applying role-based access control.
- Verified feature reliability before release, by debugging and running integration tests while managing source code in Git/GitHub.

Full-Stack MERN Developer Intern | CipherSchools — Jun 2024 - Jul 2024

- Delivered 3 full-stack web applications from architecture through deployment, using MongoDB, Express.js, React.js and Node.js.
- Secured role-based access across those applications, by building RESTful APIs with JWT and bcrypt authentication.
- Improved UI consistency and code maintainability, by creating reusable React components with Hooks and Context API.

PROJECTS

Hometown Hub | Next.js 14, TypeScript, Supabase, Prisma, Three.js, Leaflet Aug 2026

- Mapped hometown heritage, landmarks and oral histories for users, through 3D location-aware views built with Three.js, React Three Fiber and OpenStreetMap.
- Activated live community interaction, by adding Supabase chat with typing indicators and image sharing.
- Organized local activity, by building community feeds, events with RSVP tracking, and a HOME/NOW/EXPLORE location view.

AI Job Market and Skill Gap Analysis Dashboard | Python, SQL, Streamlit, Pandas, NumPy, NLP May 2026

- Surfaced salary trends, in-demand skills and hiring patterns from live job market data, by building an end-to-end ETL pipeline with REST APIs.
- Extracted skills from job postings, by automating data cleaning, preprocessing and NLP.
- Deployed an interactive dashboard that supports career-planning decisions, by combining KPI tracking with exploratory analysis results.

Chef's AI Studio | React.js, JavaScript, Framer Motion, Claude Vision AI May 2026

- Generated personalized recipes from ingredient photos, by integrating Claude Vision AI for image analysis.
- Streamlined meal adjustments, by adding recipe remixing and ingredient scaling.
- Introduced hands-free cooking, by combining speech recognition, browser Web APIs and Framer Motion animations.

Precision AgroGuard | React.js, Node.js, MongoDB, IoT Sensors, ML May 2026

- Targeted efficient water management for sustainable urban farming, by building an AI and IoT-powered platform around real-time environmental monitoring.
- Forecasted irrigation needs, by applying machine learning analytics to live sensor data.
- Connected sensors to a monitoring interface, by developing the full-stack application with React.js, Node.js, Express.js and MongoDB.

Full-Stack Subscription and Rewards Platform | React, Node.js, TypeScript, Express, Supabase, Stripe Mar 2026

- Processed recurring payments and user subscriptions, by integrating Stripe billing with Supabase-backed data management.
- Restricted features by user role, by implementing role-based access in a TypeScript and Express backend.
- Rewarded subscribers automatically, by designing a scoring engine tied to subscription benefits.

EDUCATION

B.Tech, Computer Science and Engineering | Lovely Professional University | CGPA 7.5 Aug 2022 - Jun 2026

RESEARCH PUBLICATION

- Published a peer-reviewed IEEE paper (ICPCSN 2026), "A Comparative Evaluation of Vision Transformer and CNN Models for Diagnosing Solanaceae Leaf Diseases," as measured by a benchmark of 4 architectures (ViT, ResNet, VGG, EfficientNet), by designing the full preprocessing, model configuration and evaluation pipeline. ieeexplore.ieee.org/document/11543989

CERTIFICATIONS AND AWARDS

- Google Data Analytics Professional Certificate and Google UX Design Professional Certificate (Coursera), Nov 2025
- Project Management Specialization, University of Colorado Boulder (Coursera), Apr 2026
- SAP Certified Associate, Data Analyst, SAP Analytics Cloud
- Infosys Springboard: Principles of Generative AI (2025), Front End Web Developer (2025)
- Cloud Computing, NPTEL (2024); Full-Stack MERN Development, CipherSchools (2024)
- HackerRank SQL Top 50 badge; Deloitte Australia Data Analytics Job Simulation (Forage)
